

Project Name: College outing managing system

Group Members:

- 1)Gajjala Akshay Reddy(2021BCS0010)
- 2)Somu SasiKiran Reddy(2021BCS0150)

Project Description:

The main objective of our project is to book an outing in online application. In this way we can reduce burden of hostel wardens to give outings on weekends. So I am going to do Online this process and students will get an e-outing pass by an email.

Project Overview:

This project contain two type of outings. One for general outing on weekends and another one Leave for vacation.

In General outings:

Students need to fill up a form which will available on website. And they will get an email e-outing pass after submitting form, Name and Roll number and further details store in database.

In Leave outings:

Students need to fill up a form which will available on website. Here admin (hostel warden) can approve the leave for student and e-outing pass send vial email, Details will store in database.

Tools:

Front-End(Html,Css,Javascript,Bootstrap)

Python,Flask,Django

Mysql database server,Sql query language
